CO₂ storage: Offshore Activities per Project Phase

Activities, Processes & Events	Site exploration, characterisation & assessment	Project develop- ment/installation & start	Operation	Closure and post-closure phase (incl. transfer of responsibility)
Data collation & aquisition (storage site, complex & surrounding)	Various methods			
Monitoring	Space-use characterisation of individual activities with respect to			ing, hods
Store developmer infrastructure: in maintenance, (r CO ₂ transport an	duration	spatial extent	plannability 15	
CO ₂ migration in store reservoir				finued g, dissolution, meralisation etc.
Leakage or significant irregularity			- Jones C	Various processes possible
Corrective & mitigation measures			In case of leakage or signif. irregularities	In case of leakage or signif. irregularities

Workshop-Organisation

Anmeldung noch bis 30.9.2023

Geotechnical implications of legal requirements (KSpG,) on exploration and monitoring (M1)

Quelle	Gegenstand der Untersuchung	Mögliche Parameter (→ Methode/Größe)
Anl. 1 1.1 a)	Geologie	Schichtenfolge
©:	555,594	Stratigraphie
		Gesteinsart
		Schichtverbreitung
		Diskordanzen und Ausbisse
		• Struktur, (s.u., 1.1.f)
Anl. 1 1.1 a)	Geophysik	Schwerefeld am Meeresboden
	300 AU	Elektrische Leitfähigkeit der Schichten
		Untergrundtemperatur f(Tiefe)
		lithostatischer Druck f(Tiefe)
		Richtungen und Beträge der Hauptgebirgsspannungen in den verschiedenen Gesteinsschichten

Appendix 1: 19 exploration items

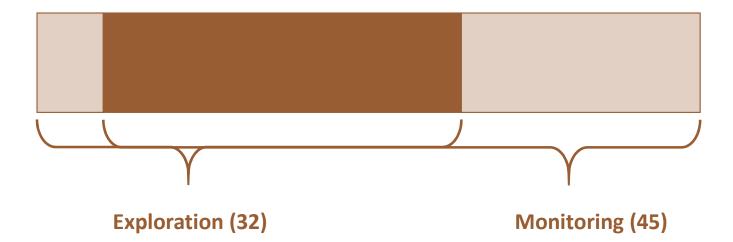

113 possible exploration activities (parameter)

Compilation of (marine) exploration and monitoring methods

26 publications (2002 – 2022) including compilations of methods In principle, about 50 methods with many variations and applications

AP5.2 Rechtliche Rahmenbedingungen

Discussion of selected concept proposals

- (brief) work plans in European exploration permits, including storage options (NO 7, UK 28, DK 3, NL 2, GR 1)
- proposed monitoring plans in early, withdrawn storage permits (Road, Goldeneye)
- general monitoring concepts
